

A simple LMS
to grow your
human capital

SkillPort®

"We believe technologies such as SkillPort will result in greater utilization of learning resources that matter, while saving organizations the money and time typically wasted on ineffective information searches."

MICHAEL BRENNAN
Program Manager
IDC Learning Services Research

People are a company's most valuable resource, and organizations that make the commitment to hire, engage and develop the best employees, at every level of the company, are better positioned to compete in a global economy. Fostering learning that is properly aligned with business objectives allows companies to retain their best talent and achieve the highest levels of organizational performance. Leaderquest is focused on providing learning solutions that support a broad spectrum of business objectives, across all industries, to maximize the investment in human capital.

The SkillPort learning management system (LMS) allows companies to provide valuable learning assets to employees around the globe in several modalities including video, audio and interactive formats, all geared toward supporting learner needs. Learners can access the full range of learning resources available to them at work, home or on the road.

SkillPort has been the platform of choice for more than 2,300 global organizations and seven million end users. Our customers have found SkillPort to be an easy-to-implement, reliable and cost-effective system to deploy learning content within their organizations.

Low Burden. High Impact.

Features for Learners

- Catalog
- Personalization options
- Direct Books24x7 access
- Download and mobile options
- Assistive technology support
- Mentoring

Features for Administrators

- Custom logos and branding
- Custom pages and shortcuts
- Completion criteria
- Course evaluations
- Bulk updates
- Export to .csv
- Multiple admin levels

Search & Learn®

Central to SkillPort's rich, on-demand learning environment is Search & Learn, which provides learners a fast, easy and effective way to search a broad array of e-learning content. Search & Learn produces robust and accurate search results that include direct access to available resources including online, virtual and instructor led courses, online books, live mentors, practice certification exams, custom-built learning programs and more. Learners and managers can easily target learning from search results by choosing the assets that meet personal and corporate objectives.

Simple

Simplicity is a fundamental goal of SkillPort's design. With easy-to-use features and navigation, SkillPort provides learners a quick and intuitive way to get them the training and answers they seek, encouraging them to return again and again.

Flexible

SkillPort can be tailored to meet your company's branding and business needs. With hands-on control over dozens of configuration options such as site branding and colors, system settings, user administration and content management, it is easy to integrate SkillPort into your corporate culture. A simple Web interface allows administrators to make these changes on the fly.

Easy to Implement

SkillPort enables you to launch your learning program in weeks or months instead of years. With flexible deployment options including hosted or intranet, broad workstation support and access to our best-in-class support staff, SkillPort minimizes impact on organizations' internal IT resources.

Accessible

SkillPort enables learners to access learning at the moment of need. SkillPort is compliant with Section 508 of the Rehabilitation Act, and supports screen reader technology. SkillPort's deployment options accommodate offline learners or learners with slow Internet connections.

Broad Range of Learning Resources

SkillPort supports a full spectrum of learning content—formal and informal—to meet a wide range of business needs. Content support includes: courseware, custom content, Books24x7®, KnowledgeCenter™ Portals, Live Learning™ and much more.

Virtual Classroom

Dialogue Live is a virtual classroom feature fully integrated with the SkillPort platform, allowing training program managers to provide live learning events and blended programs.

Hosted vs. Intranet

Our hosting service offers a secure, reliable method to launch and maintain your learning solution with minimal impact on internal IT resources. We bring a SaaS approach that minimizes deployment burdens on our customers, maintenance and integration through the robust platform and hosting capability. Intranet support allows organizations to install SkillPort behind the firewall.

Global Enterprise Support

SkillPort provides organizations with the ability to deploy learning solutions globally, offering support for the full collection of courseware from Leaderquest, and allowing learners to select the UI language that's right for them including US and UK English, Italian, German, French, Spanish, Polish, Russian, Chinese (Mandarin) and Japanese.

Add On Modules

SkillPort supports a number of add-on modules beneficial to customers with more complex training solutions.

Instructor-Led Training Module

With this module, traditional classroom training can be incorporated, along with e-learning content and virtual classroom training, into any learning program to create a true blended learning experience.

Advanced Reporting Module

The Advanced Reporting Module helps organizations analyze and interpret a broad array of e-learning data, thereby leading to a more comprehensive understanding of their overall e-learning program, its usage and return on their investment.

Benefits for the Learner

Search & Learn

Learners can perform on-demand, integrated searches across the full library of available resources and be directed to the learning assets that best meet their needs. Assets can be launched directly from the search results, or easily dragged and dropped into the learner's My Plan.

My Plan

Learners can create and manage their personal plan by adding, scheduling and organizing learning assets, including setting and tracking completion goals. Managers and administrators can recommend and assign courses to align each learner's My Plan to business objectives. Icons and other cues help learners easily stay on track by displaying progress, goal and due date information.

My Progress

Reports help learners track course and learning program enrollments. Learners can view and print progress reports and completion certificates.

Benefits for the Administrator

Learning Programs

Multiple learning resources can be blended into a single learning program. Administrators can manage deployment of the program for specific populations and provide the ability to track program progress over time.

Reporting

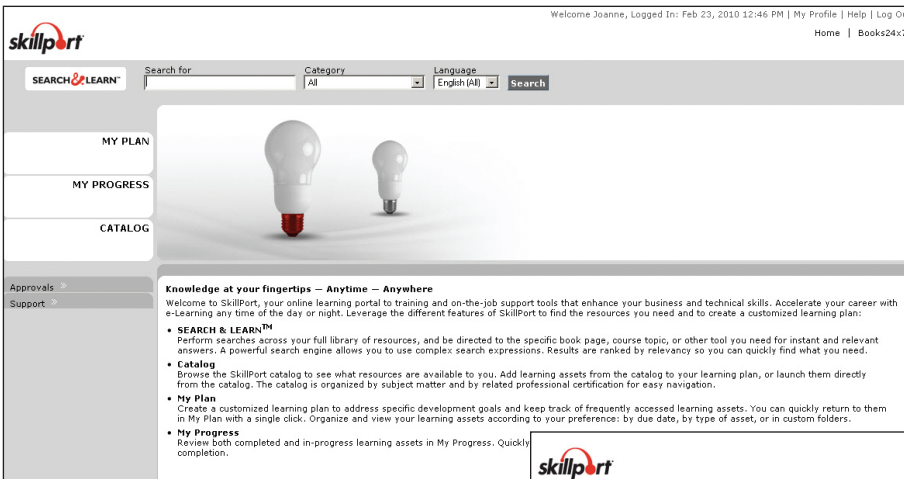

A variety of configurable reports provide summary and detailed information to help administrators monitor learning activity.

Content Management

Simple and flexible tools let administrators organize resources according to company initiatives, assign learning plans with goals and target dates, tailor learning programs for specific groups and more.

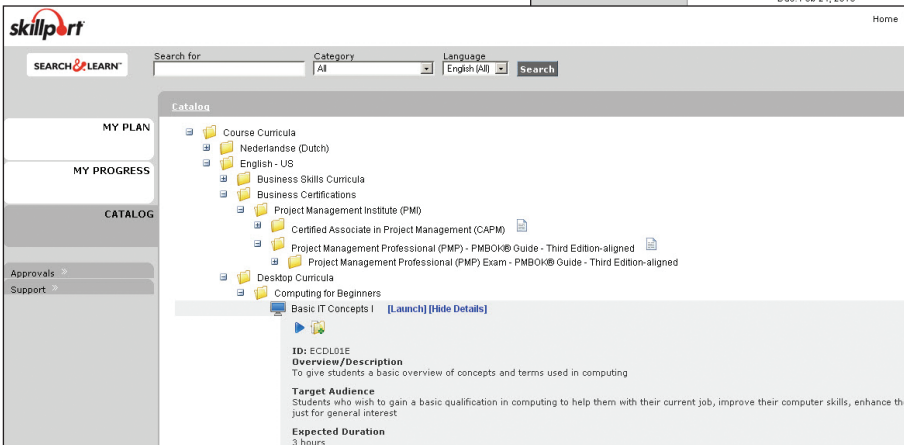

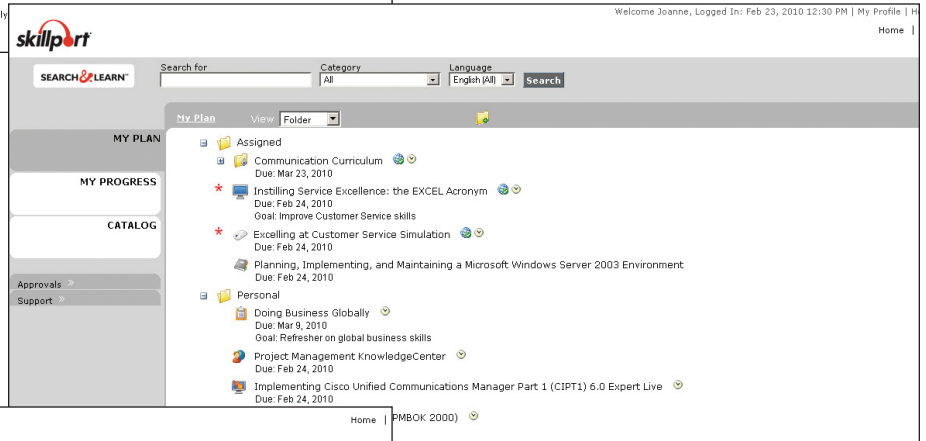

User Management

Administrators can structure learners into specific groups or hierarchies based on your content assignment and reporting needs.

Tailor the home page with your company's messaging and images.

Robust functionality and features allow learners to customize their learning experience.

Find the resource you need to create custom learning plans with Search & Learn.
